DETAILED ACTION

I. Preliminary Matters:

(a) Applicants claim that this application is a 371 of PCT/JP00/06302 and foreign priority to

Japan 11/262470 and 2000/81823 is acknowledged.

(b) Claims 1-16 are pending.

II. Remarks Regarding Restriction:

(a) Applicants elected to prosecute the invention of group I, claims 1-12 with traverse. The traversal was with regard to Group III, claim 14 only and NOT to the other groups which include claims 13, 15 and 16. The traversal was on the grounds that although group III is drawn to making a different product than group I, group III, claim 14 employs the same method as step 1 of the process as that of the process claimed in claim 1, therefore, if claim 1 is found to be allowable, claim 14 would also be allowable. The Examiner agrees in so far as group I, claims 1-12 were found to be allowable. In view of the fact that these claims have in fact found to be allowable, claim 14 has be regrouped with group I and the traversal with regard to claim 14 is moot. The restriction of claims 13, 15 and 16, not having being traversed, however, have been withdrawn from consideration as being drawn to non-elected inventions. 37 CFR 1.142(b).

III. Examiner's Amendment:

An examiner's amendment is attached canceling the non-elected claims 13, 15 and 16. This application is in condition for allowance except for the presence of claims 13, 15 and 16 drawn to non-elected without traverse. Accordingly, claims 13, 15 and 16 been cancelled. MPEP 809.02.

IV. Reasons for Allowance:

Application/Control Number: 10/088,415 Page 3

Art Unit: 1626

Applicants claims relate method of preparing 2-oxo-1,3-oxazole compounds according to claim 1 and 14. The art of record, does not teach or fairly suggest the reaction between the 2-oxo-1,3-oxazole compound and an olefin as is instantly claimed. Therefore, claims 1-12 and 14, renumbered 1-13 are allowed.
